

INDMoney – Weekly Review Pulse

Public App Store + Google Play reviews

27 June – 18 September 2026

1,323 reviews analyzed

Top 3 themes

01	App Performance & UX	272 reviews	20.6%
02	Investing, Trading & Portfolio	207 reviews	15.6%
03	Money Movement & Payments	105 reviews	7.9%

Real user voice

“dashboards are not clear,”

“Stock trade executed notification (push notifications) not working at all. After many complaints and calls also no improvement. i get all other useless push notifications, but not trade executed notification, which is THE most important for a trader. US stock deposit process fails most of the time. also interface of portfolio and trading needs to improve a lot. kindly look in notification issue”

“Cannot use any bank to transfer other than 5 listed by them. There's no way I'm gonna create new bank accounts just to trade.”

Recommended actions

- 1 Improve dashboard clarity.**
Audit high-friction dashboard flows and validate simpler information hierarchy and navigation with users.
- 2 Improve trade-notification reliability.**
Audit the trade-execution notification flow, identify delivery failures, and track successful notification delivery.
- 3 Reduce transfer friction.**
Analyze unsupported-bank demand and improve the transfer experience for users affected by bank-coverage limitations.

Methodology: Public review exports from Google Play and the App Store were combined for the 12-week period. Reviews were grouped into a maximum of five themes. Generic or insufficiently detailed reviews were not forced into a theme. No usernames, emails, IDs, or other PII are included in this pulse.

Source dataset: INDMoney review export used for Challenge 5 analysis.
